

PICKSTAR 4.0

Ergonomic and efficient picking with minimal fruit damage

***Multifunctional machine with various
superstructure options.
As hybride and also as full electric driven.***

made in the Netherlands

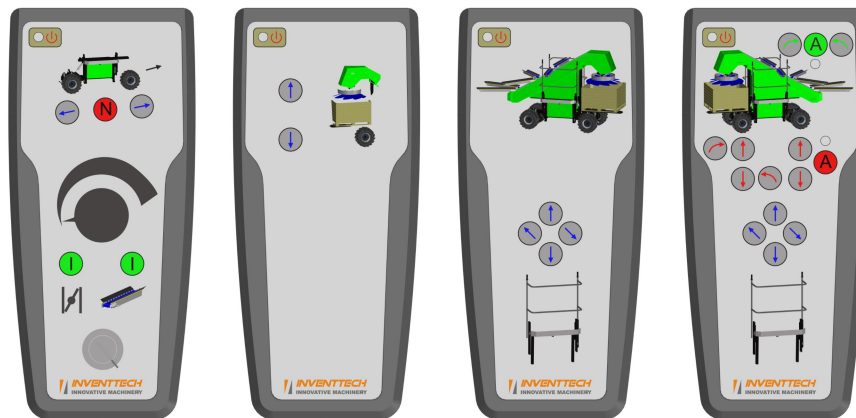

Very short conversion time from picker to aerial platform

Efficient and productive

A versatile fruit machine.

The *PICKSTAR* fruit harvest machine is an excellent tool for all seasons . It simplifies your harvesting work and increases the picking performance of your pickers considerably . It makes cutting, thinning and hail net closing as efficient as possible. The unique machine has platforms that allow the pickers to work at all tree heights, without the need for ladders. That means all risks that are related with work on ladders are eliminated forever!

The *PICKSTAR* fruit harvest machine is an Easy to use.

The *PICKSTAR* is a simple but highly functional and well-designed machine that is easy to use and operate. As a result, new picking teams can quickly start working with the machine after a brief instruction!

Productivity.

When working with the *PICKSTAR*, the pickers only have to pick the fruit and place it on small conveyor belts. The rest of the process, the filling in the box, is carried out by *PICKSTAR* itself. This means that the pickers don't waste time.

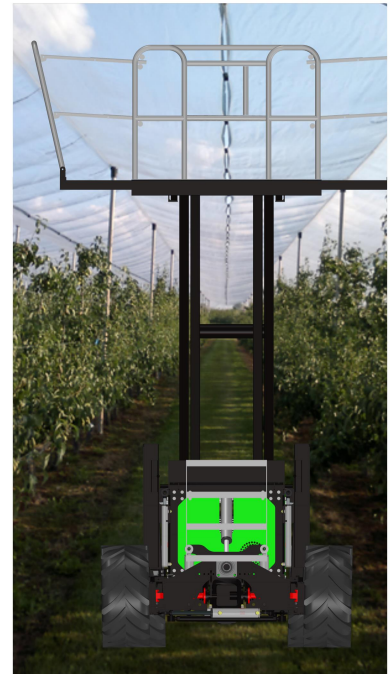

Fruit quality.

Harvesting apples pears etc with the *PICKSTAR* reduces fruit damage by at least with 50% Labour costs is also reduced by at least 40% using the *PICKSTAR*.

The PICKSTAR can be converted from a picking machine to an aerial platform within half an hour with which you can prune or open and close hail nets.

Unscrew only 4 bolts, remove 1 plug and a quick coupling. Then lift with the supplied forklift stand and place on the supplied storage stand.

This allows you to work many more hours per year with the machine and reduces the hourly costs.

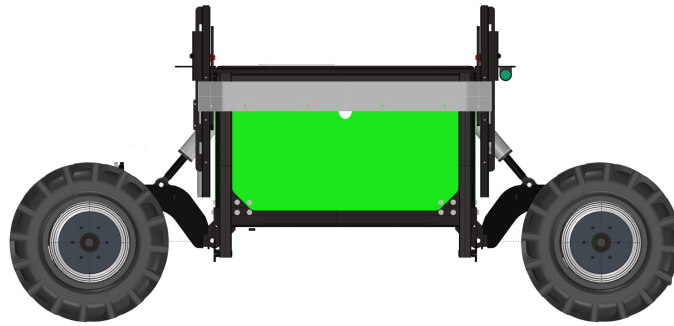

Inexpensive.

The *PICKSTAR* is known for:

- Low operating costs: from 0.5 liters of petrol per hour.
- Low maintenance costs: oil, filters and consumables.
- Longevity: The machine has a long life due to the use of good quality components.

The *PICKSTAR* fruit harvesters are EU certified. This means that they have been designed and manufactured in accordance with EU regulations. Constant improvements in operability, performance, lifespan and safety ensure that fruit growers can always count on optimum machine performance.

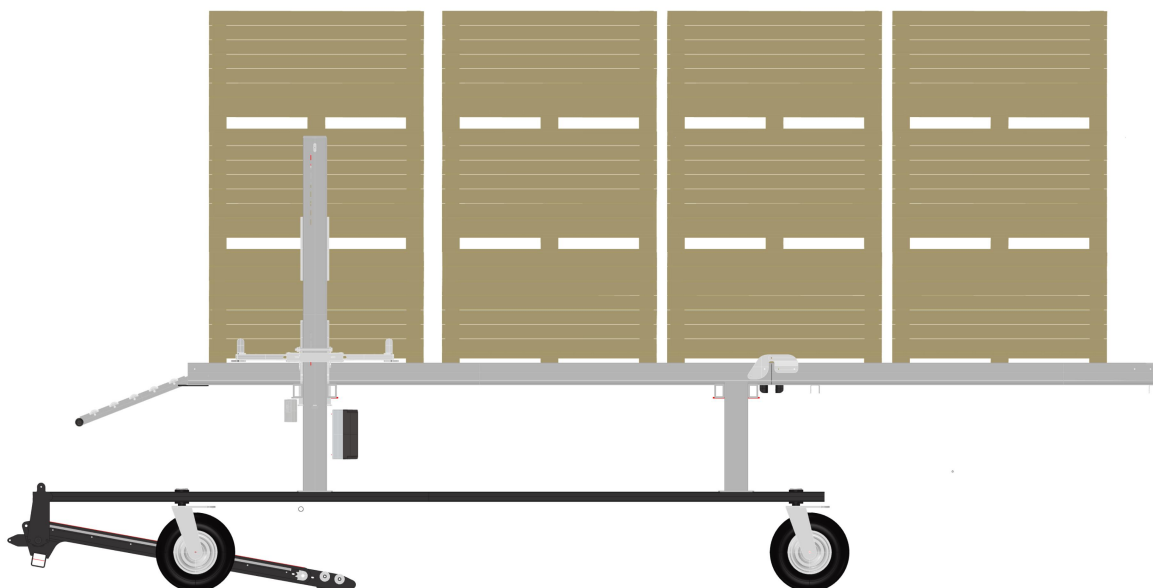

The chassis without superstructure is very compact and can steer independently thanks to sensors that scan the row of trees. GPS steering is on request. It can be performed with 4 wheel steering and also with 4 wheel drive. Driving is done with elektro motor.

This is a compact, manoeuvrable machine that is designed to work in hilly, sandy and rocky conditions. 4-6 people can pick fruit from the ground and from the 2 platforms over the 4 conveyor belts (optionally 6 conveyor belts). It is suitable for row distance from 2.50 to 4.50 m and tree heights of up to 3.30 m. Higher on request.

Empty bin trailer

The simple, but particularly practical, empty bin trailer can carry up to 15 large empty boxes, depending on the size of the bin. It has 4 swivel castors and the bins can be lifted using electrically control. The empty bin trailer is high enough so that it drives over full boxes.

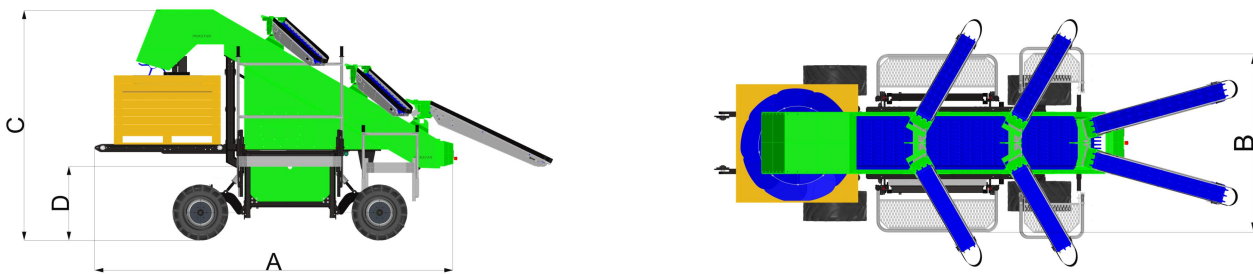

Technical specifications:

- I-Cyl engine. Petrol 9.7 kW (13 HP)
- Stepless forward and backward
- Electric driven
- Speed 0.1 - 4 km / h
- Tire size 23 x 10.50 - 12, 4-layer tubeless
- Tank capacity 12 liters Euro98

Standard data:

- 4 picking belts (50 - 200 cm)
- 2 hydraulic adjustable platforms, 120 x 30 cm
- Electric / hydraulic control
- Hydraulic steering
- Pull rod for transport

Dimensions:

Length (A)	4.16 m
Width (B)	1,81 m > 2,52 m
Height (C)	2,10 m > 2,62 m

Hydraulic platforms:

Manual operation - height from the floor (D) 0.75 m > 1.20 m

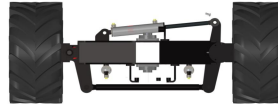

Hydraulic adjustment (D) 0.75 m > 1.60 m

Options:

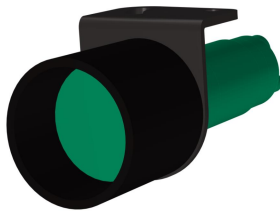

Front step platforms

Rear axle steering

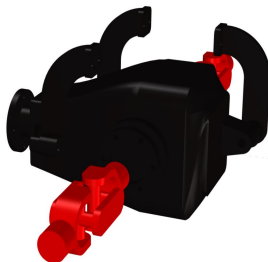

Sensor steering

Empty bin trailer

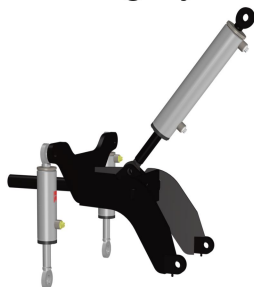

4 wheel drive

Pre-sorting box

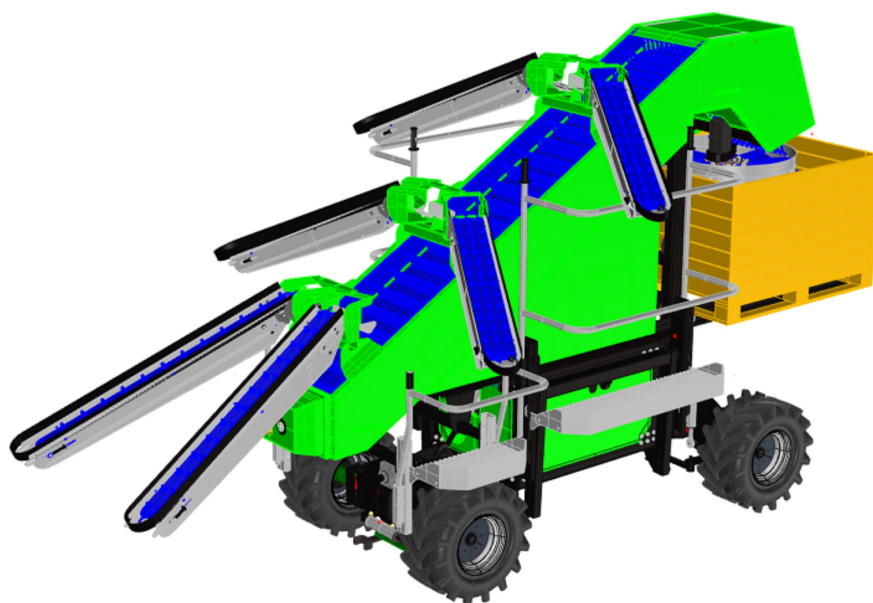

Leveling system

Full battery pack 270AH 48V with loader
